

Highlights:

- Stores up to 18 units of 19" Equipment
- Cable entry on bottom
- Punched square holes for use with snap-in cage nuts
- 1.5 mm thick cold rolled steel frame
- Easy assembly in 5 minutes
- Removable rear panel

The PR218 is a professional 19" metal rack compliant to ANSI/EIA RS-310D, DIN41491, IEC 60297 standards. The rack comes in a flat pack as DIY kit. It is a solid construction with a 1.5 mm thick cold rolled steel frame and plates, finished with a black (RAL9004) fine structured powder coating. The rack is provided with punched rack profiles for use with snap-in cage nuts on the front side and stores up to 18 units. The rear panel can be screwed off for easy installation and has a cable entrance on the bottom. Optional available wheels provide mobility to the equipment.
